Contempo Cucina

IN THE MIDDLE of an entire home remodel, Kitchen & Bath Design Consultants (KBDC) designed this incredible kitchen to meet the needs and expectations of these Connecticut homeowners. The formal dining room, family room and kitchen were merged into one large space, supporting European-style cabinets, stainless steel appliances, stone countertops and exquisite applications of glass and porcelain tile.

The room is of remarkable style and sleekness. The crisp and clean earth tone colors, lighting and design provide a stunning ambiance. A multilevel countertop makes perfect use of space by doubling the workspace. Dark cabinetry is highlighted by contemporary hardware, which ties into the stainless appliances throughout the room. The central island, loaded with ample storage, holds the weight of the room and creates space enough for everyone to gather around while meals are prepared.

The colonial-style home was modernized inside and out while maintaining its luxurious and timeless milieu, pleasing the homeowners and the designers of KBDC. Every window was replaced, the roof redone, heating system updated and the entire first floor was gutted and rebuilt, all while the homeowners remained living within. The updating of the home was a total success and the results are breathtaking. «

Strikingly Streamlined

THE OWNERS OF THIS NEWLY RENOVATED contemporary-style kitchen located in Massachusetts entrusted the design work of Divine Kitchens' Mariette Barsoum to create the domestic café they craved. The new design presents an easy-flowing kitchen with ample light and space for two cooks to work and several guests to observe the culinary creations.

Featured in this fabulous space are two islands, extensive storage and clean lines to foster a contemporary aesthetic. Rich dark-cherry cabinetry brings sophistication, while the architecture of the base cabinetry includes functional accessories to house dishes and small appliances. Slab doors and drawer fronts keep the area streamlined. Stainless steel hardware and large stainless appliances extend the modern feel.

The entertainment island holds a wine refrigerator and has a raised second level for four guests to sit and visit with the hosts. A 10-foot window emits natural light, and granite lends just the right amount of color. The perfect symmetry created by the space is one of the most eye-catching aspects of the design. The bold color choices—striking reds and contrasting light and dark hues—add a bit of spice to the area, while a perfectly framed view brings a touch of nature into a modern kitchen. The finished product left the client delighted. ◀
